Federal University of Technology, Akure.

- B.tech (Marine science and technology)

October 2011 - July 2016

Marine Science and Technology (physical oceanography and research).

PROJECTS

Trendy Shoes

Trendy Shoes is a full stack E-commerce web application. I developed it using React, Redux and css for the front end (client side) and Node Js and express Js for the backend. A non relational database was used for the data storage .

ClichE restaurant (Full stack)

clichE restaurant is a food vending web application where potential customers can place an order for food and pastries. The frontend was developed using React javascript, while the backend was developed with node javascript tech. It is fully responsive.

Goodies Shop (Full stack)

Goodies shop is a basic E-commerce web application designed to present varieties of everyday items, e.g electronic gadgets etc. I developed this application using React and Redux technology for the client side and node Js and express for the backend. I also used mongo database atlas for data storage.
